I、Product Overview

wireless temperature and humidity sensor is a wireless smart sensor capable of accurately measuring ambient temperature and humidity . It employs a high-precision digital sensor and is equipped with a dedicated protective cover to ensure the reliability and stability of the measurement data.

This temperature and humidity sensor can simultaneously detect the temperature and humidity in the environment and transmit the collected temperature and humidity data to the wireless temperature measurement host in real time via a wireless network.

II、Wireless temperature measurement system structure

2.1 Wireless Temperature Measurement System Structure Diagram

2.2 Schematic diagram of wireless temperature and humidity sensor

Principle and structure of wireless temperature measurement sensor

2.3 Function Introduction

Main functions	Function introduction
Temperature and humidity detection function	Real-time monitoring of current temperature and humidity.
Battery voltage self-test function	Real-time detection of the internal battery voltage value of the sensor.
Note: All data detected by the sensors are uploaded to the wireless temperature measurement host via wireless transmission.

III、 Main technical parameters

category	Parameter Indicators
Temperature measurement range	-40°C to +120°C
Temperature measurement accuracy	±0.3°C
	±0.7°C
Humidity range	0~100%HR
Humidity accuracy	±3.0%HR
	±4.5%HR
Operating voltage	2.5~3.6V
standby current	1uA
carrier frequency	433MHz
RF modulation mode	GFSK
Wireless transmission distance	≤300 meters (visible distance in open areas)
Transmission frequency	1 time/5 minutes
Product Dimensions	57.7mm*89.5mm*35.5mm
Work environment	Temperature: -20°C to +85°C Humidity: ≤ 90%RH
Storage environment	Temperature: -45°C to +90°C Humidity: ≤ 95%RH
Waterproof rating	IP65
Installation method	Adhesive/screw fixing
